Failures Overview

The following summary displays scenarios that failed.

View Feature (features-BookWithLogin-feature.html) *Book with Login*

Scenario Normal book condition has entered the address by paying using pay with your paypal ▼

Hooks ▼

Before Hooks.openBrowser() 8s 981ms

Steps ▼

Given User open the home page 056ms
And Click button sign in 428ms
When User input "azhar@gmail.com" as email and "12345" as password 295ms
And User click button sign in 468ms
And User click button My Account 617ms
When User Input "Indonesia" as location 1s 177ms
And User choose hotel 1s 251ms
When User choose check in date and check out date 636ms
And User click button search now 751ms
And User click button book now 1s 110ms
And User click button proceed to checkout 613ms
And User click button proceed1 525ms
And User click button proceed2 549ms
And User click radio button i agree to the terms of service 1s 160ms
And User click button pay with your paypal 1s 366ms
And User click button i confirm my order 087ms
 Error message
Then User get a message successfully make payment 000ms
And User click button view your order history 000ms
Then User have been finished to order and page link to order history 000ms

Hooks ▼

After Hooks.closeBrowser() 1s 805ms

▼ @BookWithLogin Feature: Book with Login

this feature will check the overall appearance of the scenario book with login

▼ Scenario: Verify button book now in page select rooms condition have not filled in the address

Given User open the home page

And Click button sign in

When User input "as@gmail.com" as email and "123456" as password

And User click button sign in

And User click button My Account

When User Input "Indonesia" as location

And User choose hotel

When User choose check in date and check out date

And User click button search now

And User click button book now

And User click button proceed to checkout

Then User will see display input address page

▼ Scenario: Normal book condition has entered the address by paying using pay bank wire

Given User open the home page

And Click button sign in

When User input "azhar@gmail.com" as email and "12345" as password

And User click button sign in

And User click button My Account

When User Input "Indonesia" as location

And User choose hotel

When User choose check in date and check out date

And User click button search now

And User click button book now

And User click button proceed to checkout

And User click button proceed1

And User click button proceed2

And User click radio button i agree to the terms of service

And User click button pay bank wire

And User click button i confirm my order

Then User get a message successfully make payment

And User click button view your order history

Then User have been finished to order and page link to order history

▼ Scenario: Normal book condition has entered the address by paying using pay by check

Given User open the home page

And Click button sign in

When User input "azhar@gmail.com" as email and "12345" as password

And User click button sign in

And User click button My Account

When User Input "Indonesia" as location

And User choose hotel

When User choose check in date and check out date

And User click button search now
